# Mischief Max ($MAX) Official Whitepaper

## 1. Introduction

Mischief Max ($MAX) is a new memecoin on the Solana blockchain, inspired by the playful and mischievous nature of cats. Our goal is to create a fun, engaging, safe and profitable token that brings together a community of cat lovers and crypto enthusiasts.

## 2. Tokenomics

The $MAX token will be launched on pump.fun on 05/30/24, ensuring a safe token and automatic liquidity pool creation at Raydium. Pump prevents rugs by making sure that all created tokens are safe. Each coin on pump is a fair-launch with no presale and no team allocation.

## 3. Security

Security is our top priority. We to utilize pump.fun to ensure the safety of the $MAX token and protect our community from potential threats.

## 4. Roadmap

Our roadmap will detail the planned developments and milestones for Mischief Max. This includes marketing strategies, partnerships, and future updates.

## 5. Team

Two doxed devs and three additional experienced core team members. A team of seven admins currently at time of launch. The entire team has experience and have worked together on another project previously.

## 6. Conclusion

Mischief MAX ($MAX) won't be a pump and dump project.  It will be a fairly launched Solana cat token,

with zero team allocation at launch with long legs.

MAX will utilize a proven team that has demonstrated full transparency and community building with another successful Solana project.

MAX will have based devs and a based experienced team at all times, there will never be a CTO for $MAX.  Simply put, this is a real long-term project with extremely high targets.

The community will help lead the way however, for Mischief Max's future and help steer the project as it develops. In fact, many our previous projects community will be joining MAX and our new community immediately. 🐱👤
